- Heli-portable drilling operations
- Blast hole drilling
- Horizontal/highwall drainage
- Steam relief well drilling
- Remote exploration projects
- Mine site production specific drilling
- Well descaling/workover activities
- Geotechnical drilling and testing

# YOUR BEST DRILLING PARTNER IS ALSO PNG'S BEST

Today more than ever, drilling projects must deliver the best possible return on investment.

Therefore, one of your organisation's most vital decisions is in the selection of a business partner who will deliver a superior drilling solution and achieve your company's performance goals.

When you choose Anitua Radial Drilling Services, you join a growing list of companies that are achieving excellent results by taking their operations to a higher level of efficiency.

## The Perfect Partner

Anitua Radial Drilling Services is one of the major providers of surface drilling solutions in Papua New Guinea.

Our experienced drillers and supervisors bring a wealth of knowledge and skills to each new project – a level of experience that is unmatched in Papua New Guinea – and our specialised equipment, diverse mobile fleet and highly skilled team combine to make us the leader in our field.

We bring to the table local experience, cultural knowledge, professionalism and strong management to make Anitua Radial Drilling Services a perfect partner for your organisation.

## How we face the challenges makes all the difference

Anitua Radial Drilling Services is PNG's only geothermal expert drilling company. We cut our teeth in one of the world's most technically challenging drilling environments: the Lihir Island Gold Mine.

This 20 year baptism under fire, day after day facing highly variable drilling conditions, gave us the expertise and high competency to deal with all aspects of geothermal drilling.

Geothermal wall completion is one of our specialties.

Our expertise is supported by investment in capacity. We recruit high quality teams and the best rigs and equipment.

Drilling is more than an operational function of business. It's about relationships and trust in a team that is on your side, and by your side.

## Training puts a strong team at your side

Anitua prides itself on operating to very high standards. All operators are trained to meet Australian Drilling Industry Training Committee standards and Papua New Guinea training requirements.

Training delivers high quality and certification, producing a team of experienced drillers and supervisors who bring a wealth of knowledge and skills to each new project.

We are one of the few companies in Papua New Guinea that can certify equipment operators to this level.

Additionally, our great respect for local customs and cultures drives us to provide local sustainability by hiring and training local PNG people.

## Safety is our number one priority

Safety is in everything we do. You find it in the way we act, the way we talk and the way we think.

Employee training and development drive continuous improvement in safety and in the management of risk throughout our workplace, operations and processes.

It's more than removing hazards. It's in the creation and maintenance of a culture of safety.

Anitua Radial Drilling Services safety systems and procedures are in accord with PNG and Australian mine safety legislation. We also have an expert SHEC team (Safety, Health, Environment and Community) that operates with a single aim of maintaining safety as our number one priority.

Our systems align to ISO 18001, 14001 and 9001 principles.

We have been recognised for our devotion to safety in being awarded three consecutive 'Safety Through Innovation' Awards (2012, 2013, 2014). Our SHEC team also conducts its own Safety Leadership Program.

Our absolute focus on safety and training is part of our commitment to deliver world-class solutions.

### A team that is on your side

The combined strengths of local experience, cultural knowledge, highly trained staff and strong management, makes Anitua Radial Drilling Services a perfect partner for your organisation.

Drilling is more than an operational function of business, it's about relationships and trust in a team that is on your side, whose safety record supports yours. A team with knowledge, understanding and commitment to training that extends to the development of local people.

### A personalised way of doing business

What makes our approach to business unique is the way in which we work with organisations. Building a strong relationship based on respect, shared knowledge, smarter thinking and ongoing support – that is the Anitua Way.

It's a personalised way of doing business, one that builds our business around our clients to deliver their best imaginable solutions.

### Employer of choice in our region

As a landowner-owned business, we have not only experience but also empathy working with landowners.

We pride ourselves on our ability to employ and work well with people of wide cultural backgrounds and provide local sustainability.

Our deep understanding of both customary and modern-day laws in the PNG region assists in the facilitation of smooth business dealings between contractors and local landowners.

The development of local people who then bring prosperity to their communities is embedded in the way we work and in our culture.

**WHEN YOU NEED RESULTS, WE GET THE JOB DONE**

## TAKE YOUR OPERATIONS TO A HIGHER LEVEL

In addition to innovation, safety and training, there are many other good reasons to have Anitua Radial Drilling Services as your business partner

- Range of drilling options
- High quality, reliability and professionalism
- Specialist in geotechnical and environmental investigation
- Better value by achieving operational goals through precise estimating and schedule-setting
- Precise instrumentation, expertly maintained
- Field crews experienced in harsh and difficult environments
- Supported by the resources of the Anitua Group
- Experience and ability to work with national workforce and landowners
- Improved productivity and profitability through our specialised knowledge and skills

*Diverse Services – Delivered Solutions*

Anitua Radial Drilling Services is part of the Anitua group – a diverse range of specialised companies complementing and supporting each other to provide value to organisations across many industries.

We pride ourselves on our ability to employ, and work well with people from numerous cultural backgrounds and to provide local sustainability. Our focus on safety and training is part of our commitment to the delivery of world-class solutions.
