

MINING, CIVIL & EQUIPMENT

## EXPERTISE ACROSS MINING AND CIVIL CONSTRUCTION

Our breadth of mining and civil construction expertise is spread across four separate business units, each with a focus on specific skills, equipment, products and services:

- Contract Mining
- Road and Civil Construction
- Mine Site Support and Mining Equipment
- Quarrying Services

## BRINGING OPERATIONAL EFFICIENCIES FROM DAY ONE

Achieve quality outcomes, while reducing the risk and complexity of equipment ownership, staff employment and training.

Diverse Services  
*Delivered Solutions*

# SPECIALIST KNOWLEDGE AND BREADTH OF EXPERIENCE

Outsourcing your fleet reduces the risk and complexity associated with equipment ownership and the employment and training of staff. With Anitua Mining Services you can be fully operational from day one.

Safety, training and innovative problem solving are critical to the success of our approach. We consider safety to be a way of life.

In addition to mining services such as earthworks, quarrying and earth moving, we provide road and civil construction services.

We are a 'one stop shop' for all things mining and earthmoving – with the ability to provide complete end-to-end solutions.

## Contract Mining

With the ability to supply, manage and maintain large mining equipment, we have contracts for the movement of up to 20 million cubic metres of material.

We can source the appropriate fleet to meet your mining needs from small-scale alluvial operations to major mine development projects. We can also provide the people, resources and expertise to undertake and complete material movement contracts.

## Mine Site Support and Mining Equipment

The mine site support group provides earthmoving equipment and dedicated supervisors and operators on an hourly or day-hire basis. Fully equipped workshops provide trained and qualified mechanical support with the ability to service, repair and maintain the fleet. Projects such as crusher feed, drainage, batter trimming and clearing can also be undertaken.

## Quarrying Services

Our quarries produce materials for mining and civil projects. We can support, operate and provide crushers for material sizing or provide suitable materials for construction projects.

## Road and Civil Construction

Our roads projects have included town and rural road construction, upgrades and sealing. Our civil construction and earthworks projects include a diverse range of engineered foundations, build pads and pipeline earthworks.

### **When you need results, we are there to get the job done**

We have 20-years+ experience in some of the world's most technically challenging environments, and long-standing relationships with leading organisations. Our specialised equipment, mobile fleet and highly skilled team with a 'can do' attitude combine to make us the leader in our field. We deliver the benefits of improved productivity and profitability due to the smarter thinking that goes into our approach.

### **Training puts a strong team at your side**

Anitua prides itself on operating to very high standards. All operators are trained to meet Australian Registered Training Organisation (RTO) standards and Papua New Guinea training requirements.

We are one of the few companies in Papua New Guinea that can certify equipment operators to this level.

Additionally, our great respect for local customs and cultures drives us to provide local sustainability by hiring and training local PNG people.

### **How we face the challenges makes all the difference**

Working in some of the world's toughest environments breeds a different way of thinking. Safety, training and innovative problem solving are critical to the success of our approach. We consider safety to be a way of life, not just a workplace activity. Our experienced operators and supervisors bring a wealth of knowledge and skills to each new project. A level of experience that is unmatched in Papua New Guinea.

### **Safety is number one**

We do more than adhere to industry standards, we exceed them. This commitment to safety extends beyond just keeping our workers safe. It ensures that the company's operations do not place the local community at risk of injury or property damage. In a nutshell, safety is in everything we do.

Our safe work systems are environmentally sustainable and supported by documented procedures and audited systems.

Our absolute focus on safety and training is part of our commitment to deliver world-class solutions.

## We have a comprehensive approach to the field of construction and mining

By being part of the Anitua Group we can supply more than just the earthworks. We get to support our clients from the drilling stage of the process down to the barging, accessing remote locations and building and management of camps.

## A team that is on your side

The combined strengths of local experience, cultural knowledge, highly trained staff and strong management, makes Anitua Mining Services a perfect partner for your organisation.

Mining is more than an operational function of business, it's about relationships and trust in a team that is on your side, whose safety record supports yours. A team with knowledge, understanding and commitment to training that extends to the development of local people.

**IT'S OUR APPROACH  
AND THE WAY WE  
WORK THAT MAKES  
THE DIFFERENCE**

## Employer of choice in our region

As a landowner-owned business, we have both experience and empathy working with landowners.

We pride ourselves on our ability to employ and work well with people of wide cultural backgrounds and provide local sustainability.

Our deep understanding of both customary and modern-day laws in the PNG region assists in the facilitation of smooth business dealings between contractors and local landowners.

The development of local people who then bring prosperity to their communities is embedded in the way we work and in our culture.

## Strong relationships

What makes Anitua Mining Services' approach unique is the way in which we work with our customers. Building a strong relationship based on respect, shared knowledge and ongoing support. It is our personalised way of doing business, bringing together the best aspects of partnership, support, smart thinking and experience.

## OPERATIONAL RESOURCES READY FROM DAY ONE
